DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Hermann et al. (US 4668556; provided in IDS).

With respect to claim 1, Hermann is directed to a method of applying a grooved lineal 1 to the edge portion of a glass unit 3 in the formation of a window component (Figure; abstract). The reference teaches applying a triggerable sealant 2 to the groove of the lineal (column 3, lines 10-15), urging the edge portion of the glass unit into the groove (column 16-18 and 29-30), and triggering the sealant to form a seal between the groove and edge portion of the glass unit (column 2, lines 31-36; column 3, lines 33-35).

Regarding claims 2-3, the reference teaches sealant 2 applied to both walls of the groove (see Figure).
